Note The software icon in Figure 3-1, top right, is your Photoshop shortcut. At the top of the application's main menu, your shortcut is the Photoshop symbol next to the options. After zooming in, you can also rotate the image, crops to zoom in on certain parts of the picture, set the level of contrast and brightness, and more. You can use Photoshop to change the orientation of the image, flip it horizontally or vertically, or even flip it upside down. * * * **Figure 3-1** Photoshop's useful tools (top), along with the direct action menus (bottom). 2. **2.** Select the Layers tab. Make sure the layer you want to manipulate is selected. Often, there is a layer with an outline with a plus sign on it to signify that the layer is selected. Drag the left side of the plus sign to cover the entire image. (The left-side brush tool _is_ the Selection tool.) There should now be no selection markers showing. If there are any, click the icon to select them and then press DELETE. 3. **3.** Select the Adjustments panel. You need to add an adjustment layer, and then you can make adjustments to the entire image or just to the adjustment layer by double-clicking on it in the Layers panel. 4. **4.** Select the Type. You will often use Type to set a filter for an adjustment layer. In this case, you want to select the Type drop-down menu and select Ornaments. Your options for Type include Ornaments, Text, Border, Patterns, and anything else that you can think of. 5. **5.** In the Type box, choose Ornaments. If you are not familiar with ornaments, here's a simple explanation. Ornaments are decorative effects in the form of embellishments on an otherwise

This article will show you how to edit images with Photoshop Elements. I will show you how to work with layers, how to flip and mirror images, how to crop an image, and most importantly, I will show you how to change the opacity of an image without changing the luminance of pixels (bringing out detail) or changing the color of an image (making it look too dark or bright). To edit images with Photoshop Elements, follow these simple steps: Go to: File > Open. Select an image to open or click on a previous image. If you're opening a new file, there will be a default preset with a number of options. You don't have to use these presets (if you want) but I will show you how to use the basic presets. The first drop-down list is Size. The second drop-down list is Resolution. The third drop-down list is Number of pages. Click on the one you want to use. (Depending on your system, the number of images and resolution in each are different.) Once you have the image you want open, you can adjust it with the tools at the bottom of the screen. The tools can be arranged either vertically or horizontally. Just drag the scroll-bar to the side you want. Below are some of the basic tools: Quick Mask: Allows you to make areas of your image the same color as the pixels around them. Note that this tool (called the Quick Mask) is not the same as making selections in Photoshop. To make selections, click on Selection or the RGB channel icon in the menu bar. Bucket Fill: Swaps black and white colors. Black & White: Converts your images to black-and-white, and makes the shades darker. Colored Pencil: Changes the color of parts of an image. The tool must be used with another tool on the same layer to alter the colors. Multiply: Removes the color of selected areas of an image, then blends the resulting black and white. Hue: Changes the saturation of the color of the image. Saturation: Changes the color intensity of the color of the image. Lighten: Thins the color of the image. Darken: Deepens the color of the image. Color: Changes the color of the image. 388ed7b0c7

, the real estate committee will make recommendations on the proposal. "All of this starts in November," Ulin said. "We have the new council elected in November. Then the election, which is in March, makes decisions for the next two years. We have a whole legislative session to make decisions. A lot of this is going to be on the nose because we have to get it done. The work has to get started. "We have the dual-track of applications for development and septic. In the first round, we can only deal with those in chambers," he said. "Then the dual-track starts coming in at 2 p.m. or 3 p.m." Luby said this is huge because approval by the council will speed up processing of the dual track and can help the planning board and others better assess the projects. "When we get more folks in the field, we can make decisions," he said. The initial round of applications received so far have come from the local code enforcement office, the Planning and Zoning Commission and the local code compliance unit. "As a practical matter, we are not going to have a final approval date until after the initial round in chambers," Luby said. For more information about the development process for septic systems, visit aol.com/dual-track. Ulin said the public can provide feedback to the committee at its May meeting. The group will also host a workshop on this topic in June. ROLE OF PUBLIC Members of the planning board are responsible for making sure the public has a voice in the development process. "We will not have an agenda until after the council has made all their decisions," Luby said. "We have a series of public hearings. I am committed to working with the public." Luby said the community has seen a vast increase in the quality and care of the streets. "We have focused on high-impact streets," he said, "and how we are able to 'walk, bike, drive, or transit' to our place of business." New condominiums in Royal Crest are already

Halloween Happy Hour: The Original Sexy Party (NSFW) We love Halloween at Brownstone. We may even love it more than Thanksgiving, but that's a secret. At any rate, we do enjoy The Fourth of July. We would like to do just about everything the day after Halloween. Until about a month ago. I don't remember how it happened, but for whatever reason, we did not partake in any parties, party favors, costumes, or decorations. I'm not sure what we were thinking. After all, we did just have a baby. We weren't getting any younger. The end of the year was right around the corner. The holidays were a mere two months away. We were preparing for Halloween. Why did we abandon it? Well, we had company. "What about the Halloween party?" K asked a few weeks ago. The Hallowday Party is Brownstone's annual fundraiser in October, usually held from 6-10PM. Since we're renting the house for three months (and our contract runs through May), this is our only opportunity to celebrate Halloween. We were tempted to just skip it. The last thing we needed was an additional level of holiday celebration in our lives. But we couldn't just say, "No, we are not hosting the next orgy at our house. No." So we went. Walking into the door was like walking into a Halloween party hosted by a sexpot. The decorations were incredible. The drinks were amazing. The music was perfect. The conversation was beyond sex-positive. I walked into the house and overheard a conversation between my husband and a friend. "I'm a big fan of Halloween," my husband said. "Oh yeah, it's one of my favorites, too," my friend replied. "Halloween is the perfect day to go crazy," he said. "No boundaries. No rules." My husband had a strong opinion, and my friend agreed. We talked about sex, a topic not often discussed in my social circles, especially in mixed company. I was intrigued, so I brought it up. "What do you guys think about sex?" "Man, what do you
