A demo, or free sample of any software product, is usually made available in electronic form, in order to help users check out .The present invention relates to a matrix switching device, and more particularly to a matrix switching device of a touch switch type. The matrix switching device of the touch switch type is used as, for example, the switching device of a calculator. It is, however, necessary to use as many switching elements as the number of matrix lines in order to switch an input signal provided on a matrix line by one of the switching elements. In order to reduce the necessary number of switching elements, there has been known in, for example, U.S. Pat. No. 4,304,451 a matrix switching device in which a first switching element is connected to one end of a first matrix line in series and a second switching element is connected to the other end of the first matrix line and a second matrix line is connected in parallel to the matrix line through the second switching element. In this arrangement, the matrix switching device further comprises a switching voltage source which is connected to the first and second matrix lines through the first switching element and through the second switching element, respectively, and a voltage at which the second switching element is rendered conductive is set to be higher than the voltage at which the first switching element
